

# Jude Rosen

AGENTIC ENGINEER

[juderosen@gmail.com](mailto:juderosen@gmail.com) · [juderosen.com](http://juderosen.com) · [github.com/juderosendev](https://github.com/juderosendev)

## PROFILE

---

Agentic Engineer. I direct multiple AI agents (Claude Code, Codex CLI, custom builds) in parallel to take products from idea to shipped: web apps, desktop apps, developer tools, websites and automations.

## EXPERIENCE

---

### Founder · CITEPOINT

2026 to present

Founded and built Citepoint ([citepoint.ai](http://citepoint.ai)), an AI visibility agency: getting businesses cited and recommended when buyers ask ChatGPT, Perplexity or Google what to buy.

### Full-Stack Web Development & Product Design, part-time · PYRAMID MERCHANDISING

Late 2025 to present

Sole designer and builder of the company website for a global retail planning and merchandising platform with six modules, plus the custom admin CMS behind it. Owned end to end: design, copy, build, SEO and ongoing iteration.

### Independent Product Engineer · SELF-DIRECTED

Ongoing

Built and sold Vinsly, a desktop app for managing your entire Claude Code setup (\$200+ in revenue, now open source), and ClawRamp, a \$149 SaaS starter kit for OpenClaw hosting businesses. Everything shipped through a multi-agent workflow: several coding agents working in parallel under one orchestrator.

## EDUCATION

---

### BA (Hons) Philosophy and Psychological Studies · THE OPEN UNIVERSITY

2025

First year of part-time study, completed with Distinction.

## SELECTED PROJECTS

---

### **Pyramid** · COMPANY WEBSITE AND CMS

[Live site](#)

The entire website for a retail merchandising software company, plus the custom admin CMS behind it. Six product modules, each with its own story.

### **Citepoint** · AGENCY, AI VISIBILITY

[citepoint.ai](#)

My agency. When buyers ask ChatGPT, Perplexity or Google what to buy, Citepoint gets businesses cited and recommended.

### **Vinsly** · DESKTOP APP, OPEN SOURCE

[vinsly.dev](#)

One place to manage your entire Claude Code setup: agents, skills, hooks and settings without the scattered files.

### **ClawRamp** · SAAS STARTER KIT

A \$149 starter kit for OpenClaw hosting businesses: billing, provisioning and a marketing site, ready to deploy on day one.

## CAPABILITIES

---

Agent orchestration and parallel execution

Desktop applications

Product strategy, marketing and SEO

Full-stack web development

Interface design and rapid prototyping

Automation and developer tooling
